**DETAILED ACTION**

**EXAMINER'S AMENDMENT**

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Mr. Adam L.K. Philipp (Reg. No. 42071) on 8/13/2009.

The application has been amended as follows:

Claim 34 (Canceled).

Claim 35 (Canceled).

Claim 36 (Canceled).

Claim 37 (Canceled).

Claim 38 (Canceled).

Claim 39 (Canceled).

Claim 40 (Canceled).

Claim 41 (Canceled).

Claim 42 (Canceled).

***Allowable Subject Matter***

2. Claims 1-33 are allowed.

3. The following is an examiner's statement of reasons for allowance:

Applicant's arguments, see pages 1-2, filed 04/06/2009, have been fully considered and are persuasive. As pointed out by applicant Numeral 441 in Fig. 4 is not a "root one of a plurality of hierarchically organized digital content rendering modules" as claimed. On the contrary, England specifically states, "the root of trust of secure code modules is a secure loader 410 .... Trust descends hierarchically to one or more security managers 420 .... " Col. 7 ln. 66-Col. 8 ln. 3. Therefore as pointed out by applicant, prior art of record single or in combination fails to teach or fairly suggest "one of the plain text digital content rendering modules occupying a root position of the hierarchy to exclusively receive all types of the recovered digital contents to be rendered, from the tamper resistant digital content recovery module" as recited in claim 1. Claims 18, 25, and 29 recites similar language and are allowable under same rational. Furthermore, applicant's arguments, see page 3, filed 04/06/2009, have been fully considered and are persuasive. As pointed out by applicant, "trusted modules may be "identified" by reading a list of public keys from a content provider secure DLL either upon initial load or later. However, England teaches that actual "verification" of the trusted modules occurs only once.". Therefore, as pointed out by applicant, prior art of record single or in combination fails to teach or fairly suggest "verifying with the tamper resistant digital content recovery module that said root one of the plurality of hierarchically organized plain text digital content rendering modules has not been compromised... verifying with said root one of the modules that one of the first at least one other one of the modules occupying an immediate downstream position in the

hierarchy of modules from the root module, is uncompromised before transferring the first digital content to the verified immediate downstream module to further the rendering of the first digital content” as recited in claim 12. Furthermore, Prior art of record single or in combination fails to teach or fairly suggest verifying and re-verifying step as required by claims 18 and 25. Dependent claims are also allowed by virtue of their dependencies.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled “Comments on Statement of Reasons for Allowance.”
